RECENT EXPERIENCE

University of Florida Health, Supply Chain Department

Jacksonville, FL | Data Analyst | July 2024 |

- Develop and implement advanced Excel-based functions such as Macros, VLOOKUP, SUMIF, and COUNTIF to perform financial analysis, and support cost-reduction initiatives.
- Analyze datasets and present insights to management, create reports, pivot tables, and data visualizations to drive cost-saving strategies.
- Conduct pricing benchmarks and cost analysis, evaluating vendor proposals and calculating financial impacts to identify best opportunities.
- Partner with the contract team to monitor budget and pricing changes and ensure timely rebate submission to Finance.

HCA Information Technology Group

Tallahassee, FL | Interface Application Analyst | June 2023 – February 2024 |

- Delivered level second-tier support by partnering with enterprise and facility teams, to help in the resolution of service desk incidents and elevate application performance.
- Undertook data analysis projects using Excel and PostgreSQL to identify interface contracts, create reports, and support decision-making during EHR system transitions.
- Collaborated with enterprise, division, and facility teams to facilitate the testing and rollout of new interface applications, enhancing operational efficiency.

UNIVERSITY OF MIAMI

Miami, FL | Research Data Specialist | December 2022 – June 2023 |

- Assisted in creating, updating, and maintaining research charts and case report forms, including regulatory related issues, in accordance with department standard operating procedures, under the supervision of the Principal Investigator and supervisor.
- Answered data queries for each study and assured all study requirements were documented and met both internal and external regulations in accordance with protocol guidelines.
- Cleaned and managed study data using Excel functions such as filters, PivotTables, COUNTIF, and IF to ensure data accuracy.

QUOTIENT SCIENCES

Miami, FL | June 2021 – November 2022

Clinical Research Coordinator | August 2022 – November 2022 |

- Deployed extensive project management skill sets to support ongoing research efforts, applied robust Good Clinical Guidelines, and followed all prescribed scheduled and deliverables timetables.
- Utilized Excel for data management and PowerPoint to create presentations of study progress and findings for internal and external stakeholders.
- Applied informed consent processes, maintained records, screened project participant records and referrals to identify prospective candidates for research studies.

Data Coordinator | June 2021 – August 2022 |

- Oversaw research project and clinical trial data collection and management.
- Implemented Quality Control standards to ensure accuracy of CRF entries.
- Inputted subject data from source documents into relevant client databases, meeting all eCRF standards.

UNITED WAY OF MIAMI DADE

Miami, FL | Data Administrator | September 2019 – April 2021 |

- Created and managed client and community partner information databases.
- Prepared, sorted, and ensured accuracy of all source data.
- Maintained responsibility for technology asset inventory and control.
